TRAINEESHIPS FOR PRE- AND POSTDOCTORAL RESEARCHERS WHO WILL CREATE THE NEW PARADIGMS IN GENOMIC SCIENCES

Invention is the poetry of science featuring rigorous scientific thinking and technological innovation that combine to address grand challenges through unusually creative research endeavors.

GSTP is seeking applications from graduate students and postdoctoral researchers pursuing projects featuring innovative thinking that will usher in new ways to conceive biological/genetic investigations through invention.

Please request application materials from Louise Pape, lpape@wisc.edu, and submit by Jan. 3, 2019. Your research mentor can apply to become a trainer if not a trainer already.
